KOMATSU QUALIFIED USED EQUIPMENT

REAL VALUE FOR YOUR MONEY

KOMATSU

10 steps to Komatsu Qualified Used Equipment

Only machines with a clean bill of health make it through

High quality pre-owned machines that offer real value for your money

Komatsu-certified service engineers do a full inspection of the pre-owned machine. They check the engine, all fluid levels, the hydraulic system and transmission, cycle times, and the fuel settings. They perform Komatsu Oil and Wear Analysis (KOWA) to reveal the exact condition of all major components, and then service the machine with Genuine Komatsu parts & oil. All work equipment is greased, and any required tune ups and adjustments are done. Detailed information about the machine's previous life is fully checked with available KOMTRAX™ data and service records. Only then does the used equipment receive a clean bill of health and is granted the Komatsu “Qualified” stamp of approval. Distributors can provide flexible warranty & service contract packages on all Komatsu Qualified Used Equipment, and it is backed by unbeatable aftersales service.
