

## Komatsu's PC26MR-3 mini excavator receives "Rental Product of the Year" award

*Vilvoorde, June 5 2008* - Komatsu's PC26MR-3 mini excavator received the award for "**Rental Product of the Year**" at the first ever European Rental Awards ceremony organised jointly in Amsterdam by the "International Rental News" magazine and the "European Rental Association" (ERA), to coincide with the first International Rental Exhibition (IRE).

The award was accepted by Mr. Armando Di Pace, General Manager, Marketing and Sales, Komatsu Utility Europe (Italy).

The new PC26MR-3 compact mini-excavator is the result of the competence and technology that Komatsu has acquired over the past 80 years. It was designed and developed with constant attention to the needs of customers and rental companies from all over the world. The end product is a user-friendly machine with top-class performances.

Thanks to its convenient weight, the new PC26MR-3 – with two extra buckets and Komatsu's quick coupler - can be moved on a small trailer, with only a simple car driver's licence required. No need for a big truck to easily transport the machine to a jobsite, and back to the yard.

KOMTRAX™, Komatsu's exclusive satellite monitoring system, is standard on the PC26 as on all machines in the MR-3 range. The system's simple web interface offers exceptional fleet management solutions and other cost saving options to rental companies and all Komatsu customers.

The award is a recognition of Komatsu's excellence and professionalism and will further promote the qualities of the PC26MR-3 mini excavator.
